Helix™
Height Adjustable Benching

Benching, Elevated.

Helix™ reimagines height-adjustable benching through a combination of **fast installation, flexible configurations, and distinctive design**. Together with Tonos™ privacy screens, Helix™ creates a workplace solution that feels smarter and more elevated — designed to support performance, comfort and rapid deployment.

A Revolution in Speed.

WELCOME HELIX™

Helix™ is our **proprietary, patent-pending** height-adjustable benching system engineered for superior design, reconfigurability and speed of assembly.

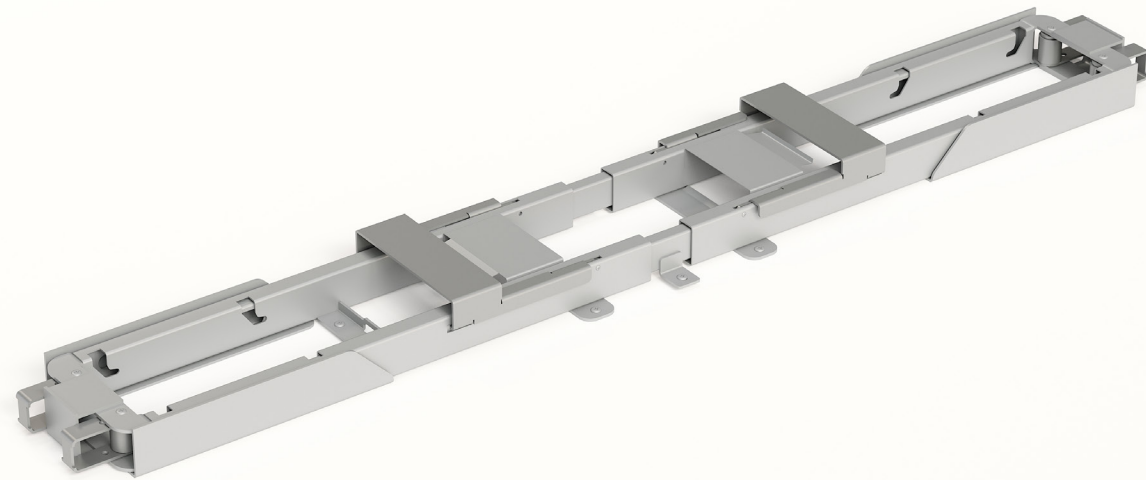

Helix™ transforms one of the industry's biggest pain points: installation. While traditional benching systems can take 1-2 hours to assemble, Helix™ frames **install in just 10 minutes** per workstation—no tools required. With a lightweight beam construction, shared joints, and locking cantilevers, Helix™ brings a new level of innovation and ease to our height adjustable workstation portfolio.

TOOL-FREE FRAME ASSEMBLY

While traditional benching systems can take 1-2 hours to install, Helix™ frames are designed for **tool-free assembly in just 10 minutes**—enabling a faster, simpler, and more streamlined experience from delivery to day one.

HELIX™

Height Adjustable Benching

3 PILLARS OF HELIX™

01 — FAST

Helix™ dramatically simplifies the installation process through a lightweight beam structure, shared joints, and intuitive, tool-free frame assembly —reducing setup from hours to just minutes.

02 — FRESH

With an updated visual signature that includes oval columns and distinctive slip-on leg sleeves, Helix™ introduces a more elevated and innovative aesthetic for height-adjustable benching.

03 — FLEXIBLE

Designed for modern workplace layouts, Helix™ supports single and double runs, 90-degree applications, adjustable widths, integrated cable management, and adaptable accessories for evolving team needs.

Helix™ integrates seamlessly with our Tonos™ privacy screens, for an entirely integrated open plan solution. With Helix™, even the most agile and evolving workplaces are supported in their open plan needs.

“Installation has historically been one of the biggest friction points in benching. With Helix™, we’ve re-engineered the process — simplifying the build without compromising structural integrity, functionality, or design.”

— SABBY PAPNOI, CLEAR DESIGN PRODUCT ENGINEER

Helix™ Features

- Tool-free frame assembly—engineered for fast and easy installation
- Height-adjustable 3-stage, oval legs
- Single run, double run, and 90-degree options
- Adjustable widths from 48”-84”
- Lightweight beam structure with shared joint design and cantilever lock
- Integrated cable management and dedicated power beam
- Signature slip-on Leg Sleeves in multiple colorways add a distinctive, design-forward look
- ANSI-BIFMA X10.1-2024

Helix™ integrates seamlessly with our Tonos™ PET privacy screens, shown here in Linen. Add Fern Leg Sleeves for an inviting, contemporary aesthetic.
