Our Story

The inception of Clear Design was somewhat of a happy accident. Founder John Warrilow, was working as a manager at an office furniture and supplies store in Sheffield, England in the late 1970s. After taking some time off from work, he went to an auction to purchase a desk for his home office. He happened to win the bid on the desk and prepared to take it home when the auctioneer asked “When will you be taking the rest of them?”

John had unknowingly bid on about 50 desks. The desks were kept in their garage, the living room, friends’ houses, and wherever else he could manage to find to

store them. He put an advertisement in the local paper selling the desks and, to his surprise, they sold very quickly! The profit John made from this accident – along with his experience working with customers, selling similar products, and delivering and installing furniture – gave him the confidence to continue selling office furniture and even establish his own business in 1982.

The company became a notable entity within the office furniture industry, proving the business model to be successful. It grew to service businesses all throughout England before migrating to the United States in 2003 where the office furniture industry had.

Sustainability

At Clear Design we take the topic of ecologic responsibility very seriously. Not only does this make sense for the planet, but it also makes good sense for our business. We have the advantage of flexibility in choosing our vendors and controlling the design/manufacturing/logistics of all our products.

The beginning of every new product project, variables like shape optimization for material use reduction, recyclability, packaging efficiency, as well as life-cycle analysis are all considered.

Every time you use Clear Design solutions for your projects, both you and your clients can feel good about helping the nation's forests. A portion of every sale goes to the National Forest Foundation and is used to plant trees that support wildlife, restore ecosystems, improve water quality, reduce carbon dioxide levels, and much more.

Manufacturing in the Americas brings materials closer to our customers and boosts our sustainability efforts

Many products are built using recycled materials like steel frames and PET dividers made from water bottles

Discontinued products are donated to non-profit organizations, schools, and more

A portion of every sale goes to the National Forest Foundation (NFF) for reforestation efforts across the country

Since partnering with the NFF, they've planted more than 25,000 trees in areas of need across the country

We are continuously looking at ways to improve our processes and products to support a green future

Products that stand the test *of time.*

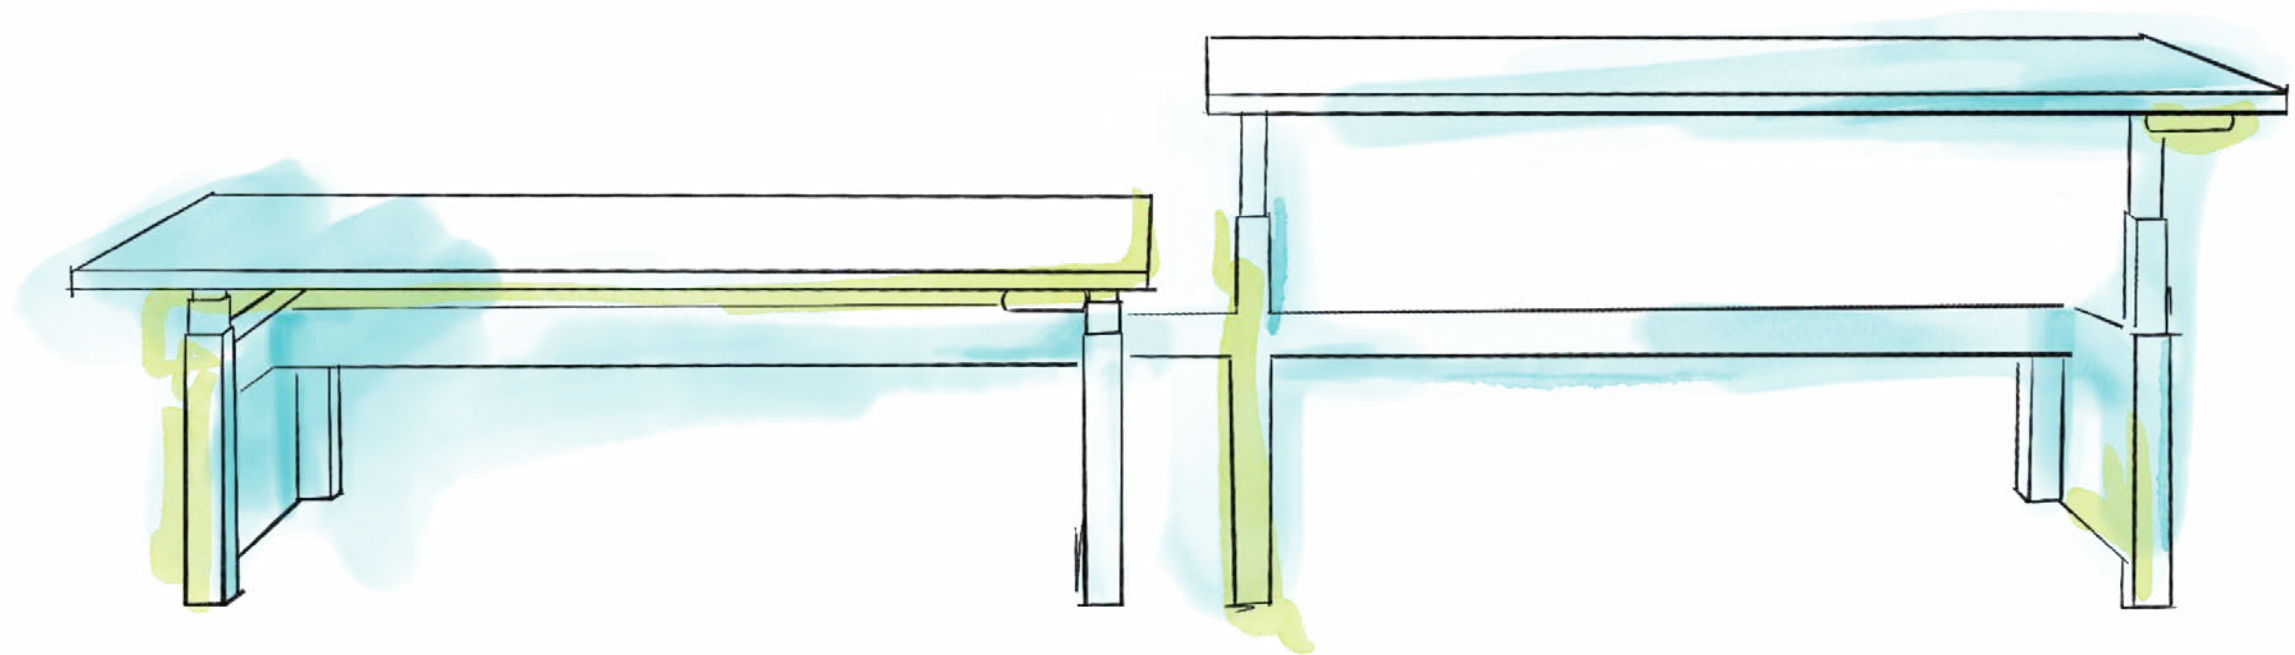

Unlock creativity and productivity in workspaces with products that are smarter, better, and get there faster.

Boost & Boost Pro

Height-Adjustable Workstations

A few years after developing Blade, there was a growing demand for more ergonomic options in the workplace. Taking from Blade's successful design, we developed a similar system that would allow companies to invest in their employees' well-being by allowing them to go from sitting to standing at the touch of a button. A few years after that, Boost Pro was created with integrated power, cable management, and telescoping frame. For the ultimate flexible workspace, we launched Boost Go height-adjustable desks with casters for easy movement and reconfiguration.

Blade

Flexible Benching System

In the early 2010s, we saw a shift in the market as businesses were resizing and looking to invest in collaborative environments that develop culture and build trust. With that in mind, we developed the Blade open-plan benching system that promotes collaboration and teamwork while taking up a much smaller footprint compared to traditional cubicles. The revolutionary design uses a telescoping frame to easily adapt and reconfigure as teams grow and still remains a favorite, go-to solution for workspaces today.

Fast and Accurate Service

With most of our manufacturing in the Americas, our centrally located distribution center is consistently stocked with a massive inventory of products that are ready to ship quickly.

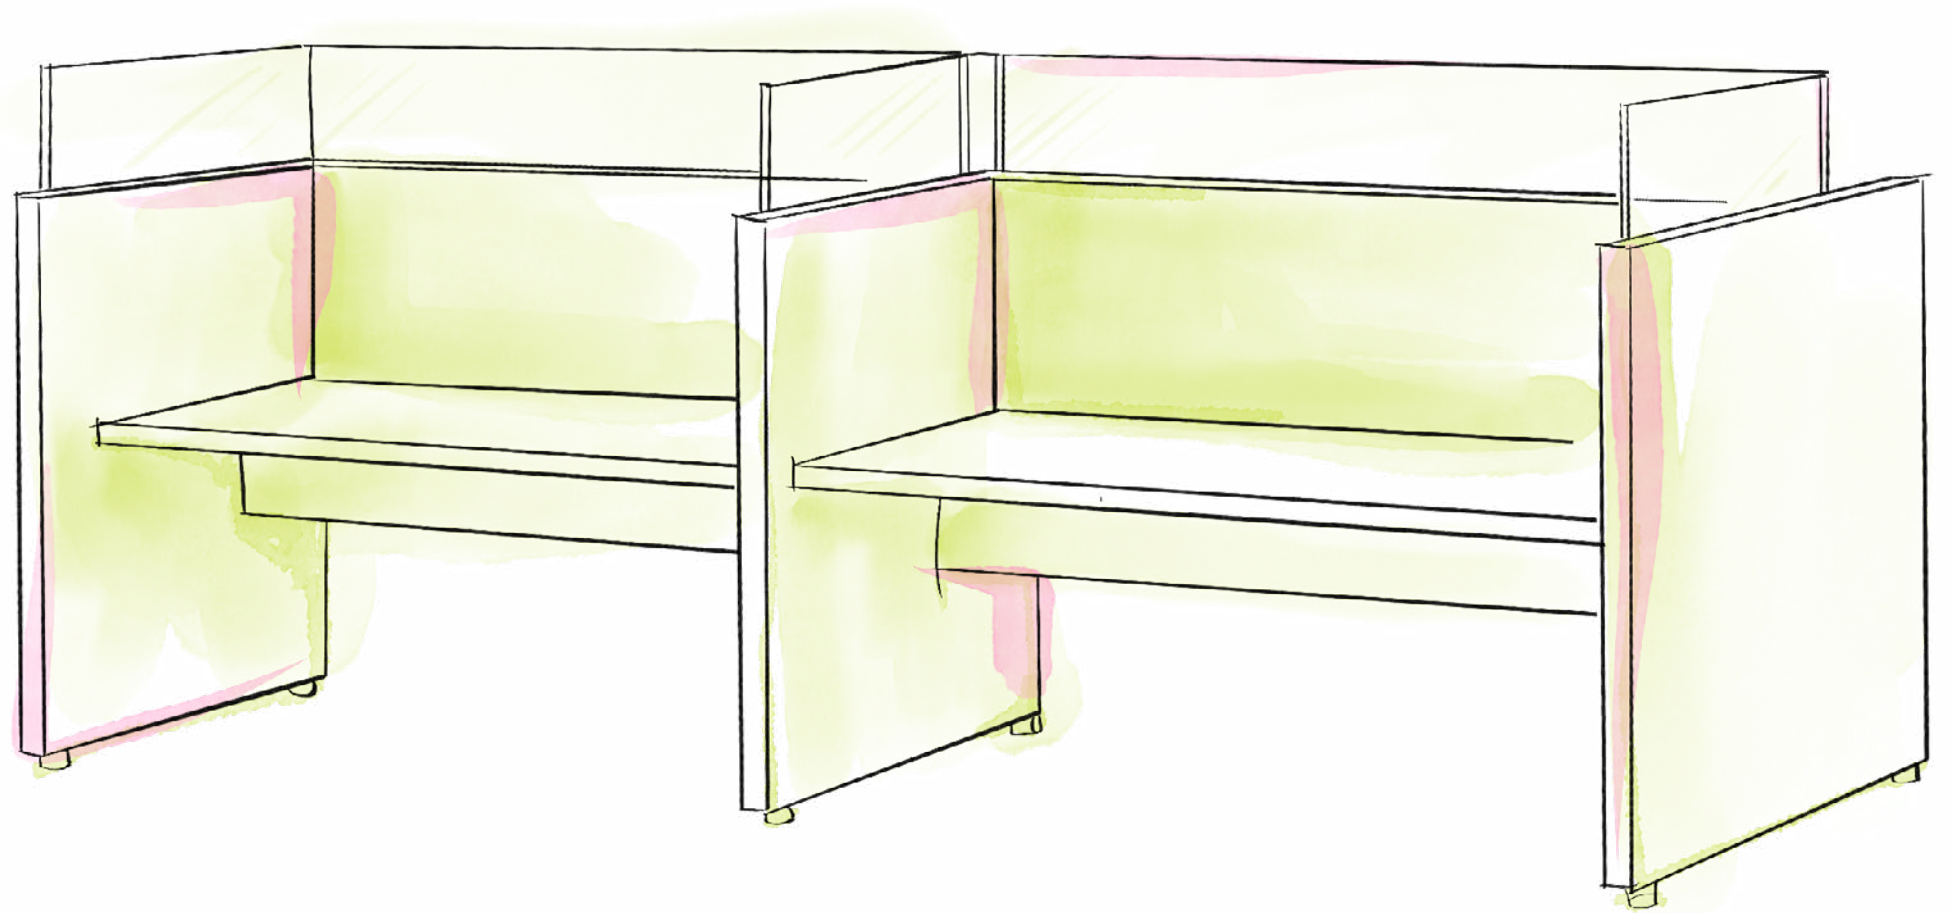

Delta

Panel System

Sleek and sophisticated, Delta brings privacy and collaboration together with ease. Five-foot laminate panels with frosted glass define space while maintaining an open, light feel.

Designed for modern workspaces, Delta works with height-adjustable or fixed benching in straight or L-shapes. BIFMA Certified, with multiple finishes, power integration, and smart storage, it offers style, function, and flexibility.

“Really fast to reply, friendly, and knowledgeable. I told someone if every company I dealt with was as easy to work with as you have been, I would be the most productive human alive.”

Kenneth M.
JSD Office Furniture

Edge

Casegoods

Edge is a bit of an anomaly out of all our product lines. There were always reservations with developing a casegoods line due to concerns of maintaining our high-level of service, speed, and efficiency that we know we can deliver with our other products. However, after countless requests from reps and dealer partners to create a private office line with a design complementary to our benching systems, we decided to take a step into the unknown and have once again come out successful in developing an extensive product line with durable materials, fast lead times, and the same exceptional quality and service you expect with Clear Design. The modular design allows for complete customization in each space for each user while keeping the overall look cohesive.

Unrivaled Customer Service

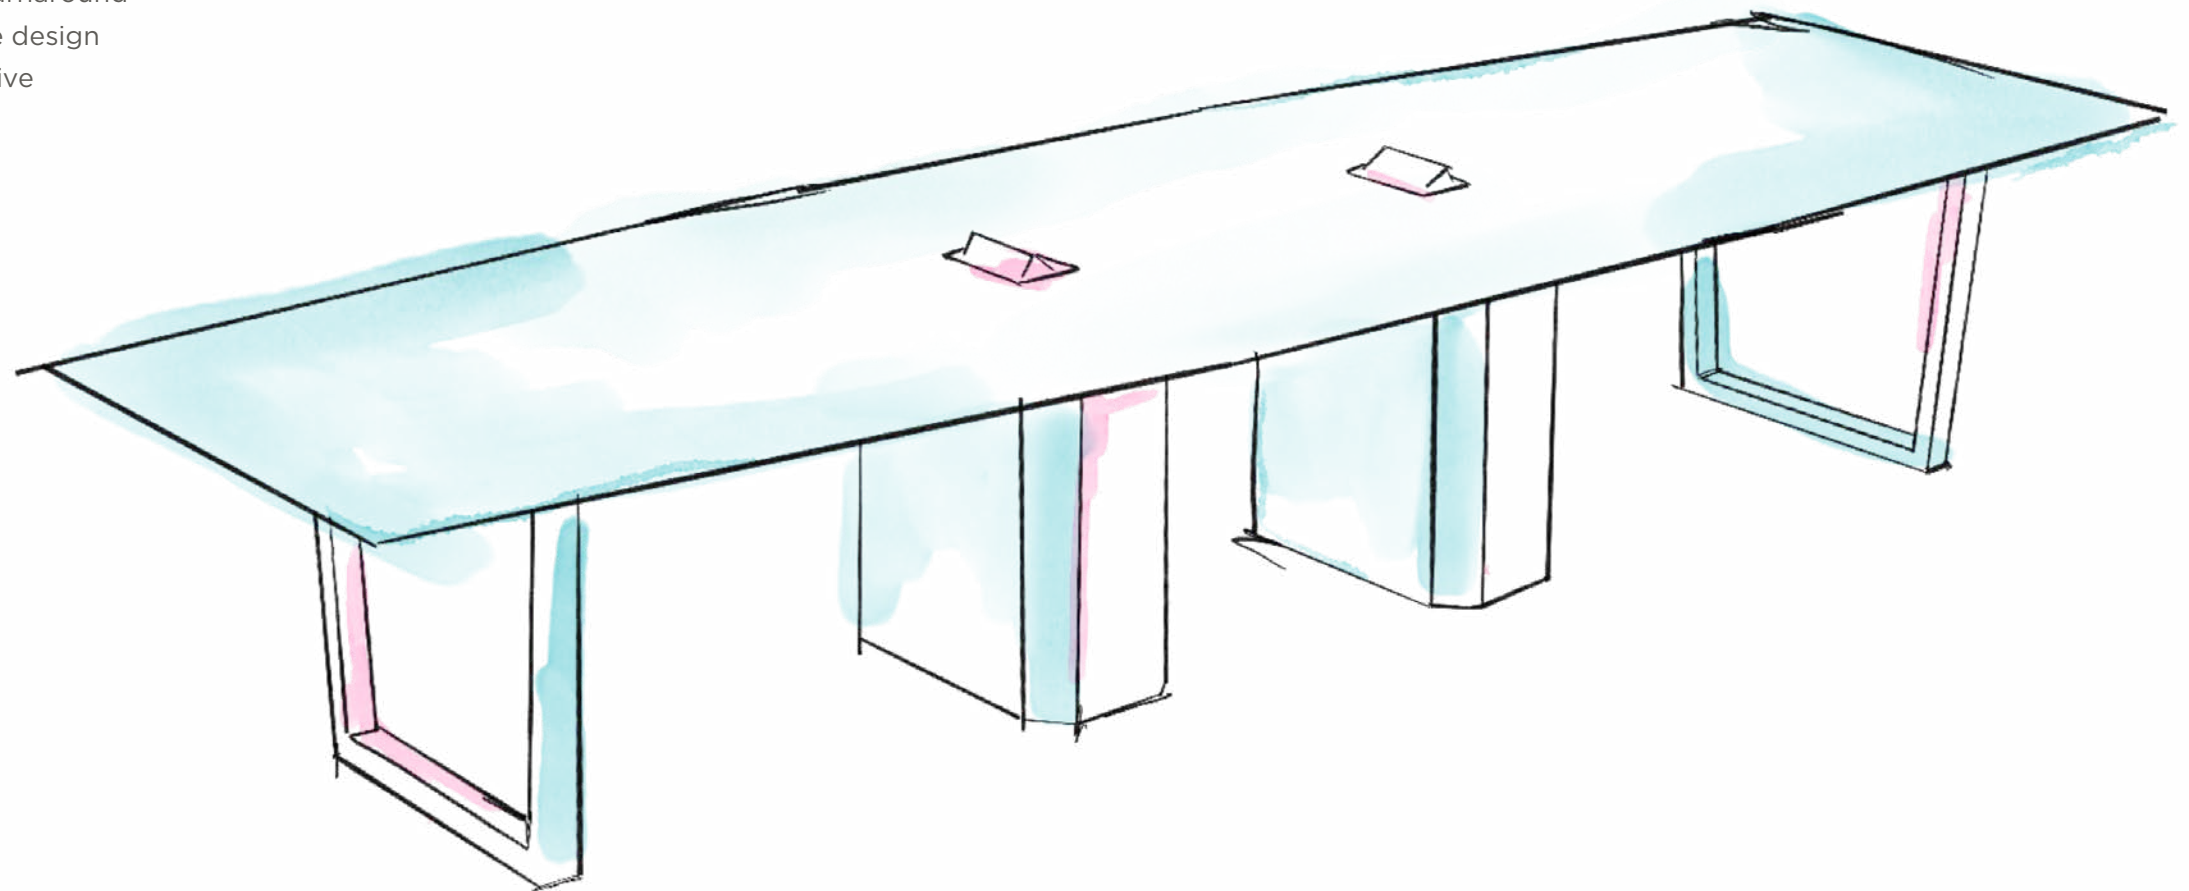

From our free quotes and renderings to our installation guides and warranties, we make the entire process easy for you.

Three60

Conference + Collaboration

Three60 launched in 2017 to accommodate the continuing rise of collaborative office spaces. We saw fit to develop a meeting space solution in various sizes and styles to appeal to both informal and formal collaborative spaces. Providing conference and collaboration tables within our FAST Program was a massive feat as it allows our partners to outfit all different types of workspaces that require quick turnaround times. Each variation of Three60 complements the design of our other product lines allowing for fluid, cohesive workspaces throughout the office.

“You guys are great partners. Not just another supplier. You work with me on every detail and strive to deliver on every need I have. Clear Design is one of the most reliable and on-time vendors.”

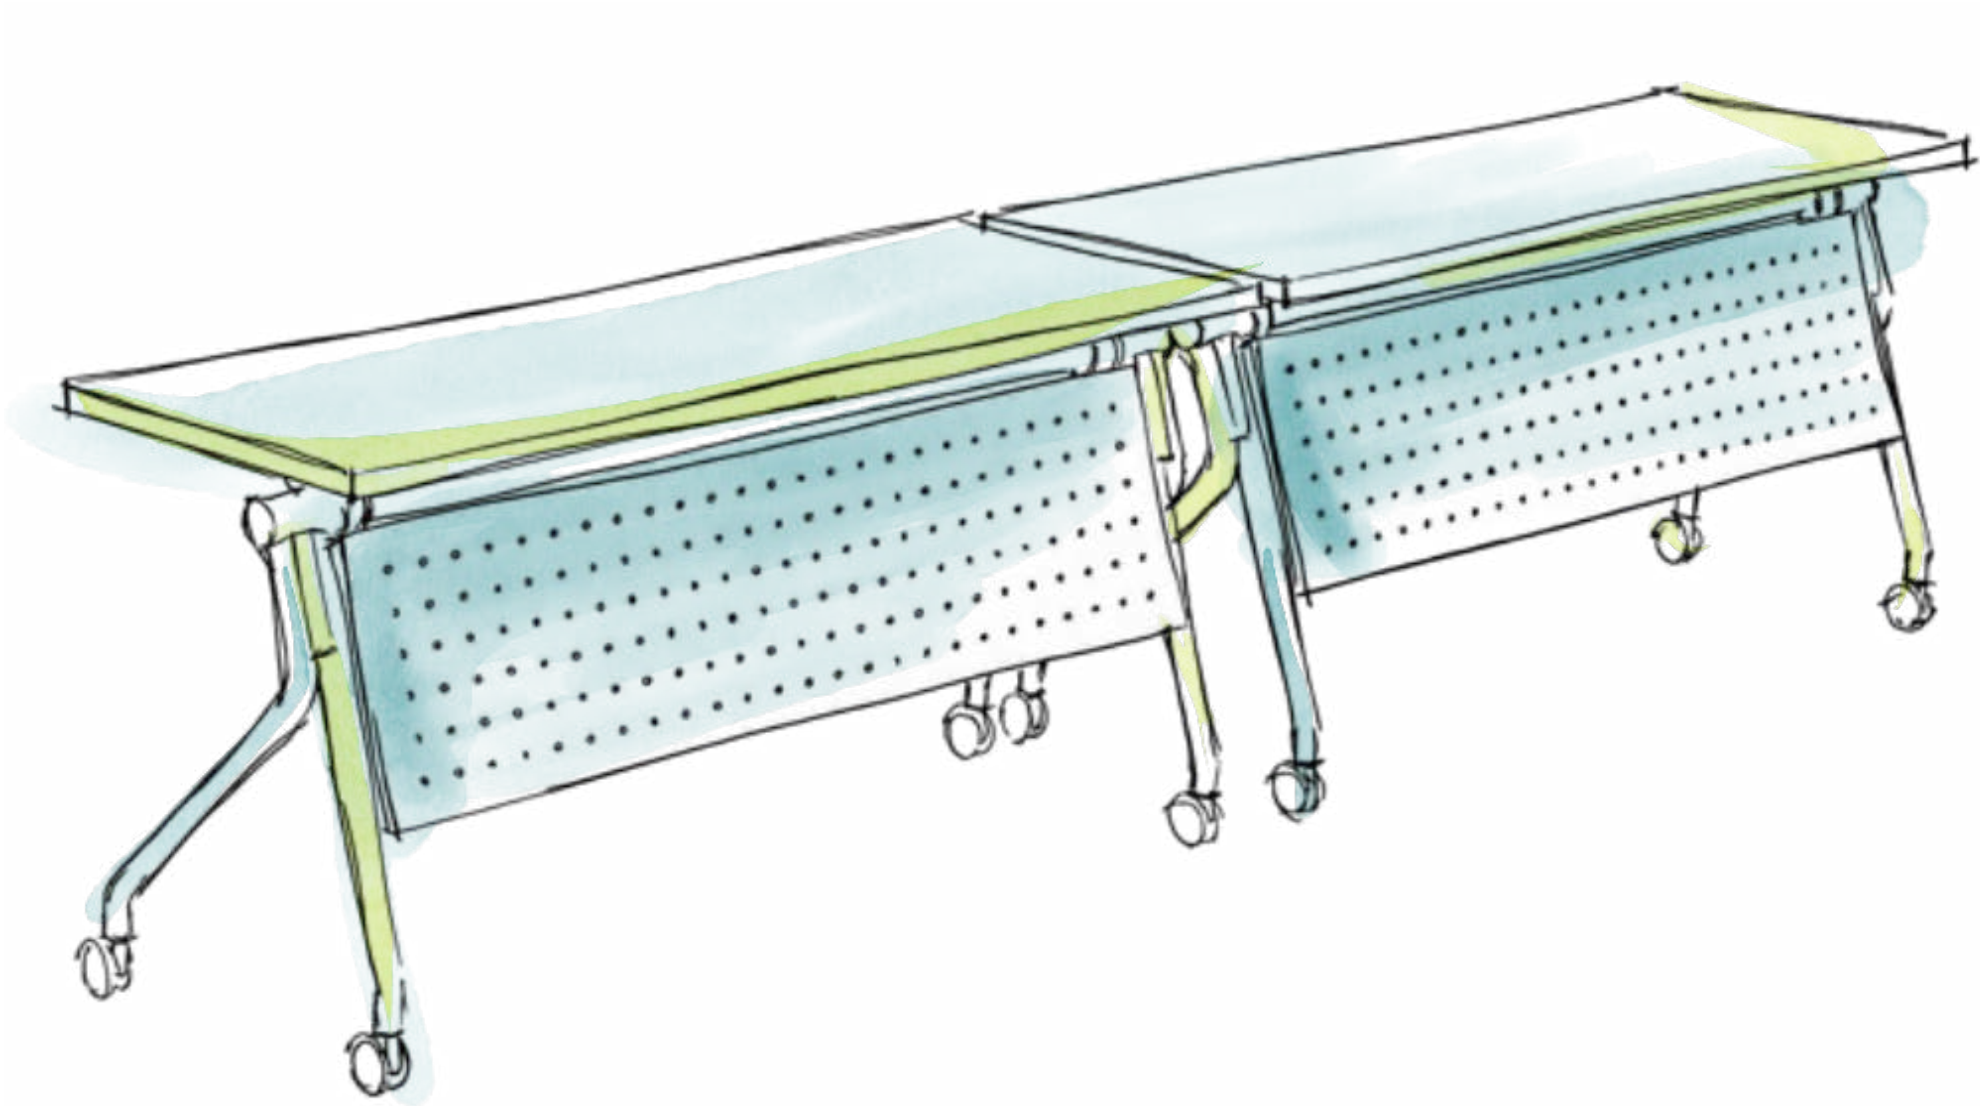

David S.
Indoff, Inc

Optima

Training Tables

The inspiration for Optima came about through seeing other training tables in the market that weren't flush with one another. We developed a sturdy, reinforced steel frame to ensure that these tables would not only look great in a space, but were built to last for commercial applications. With its many different uses, endless configurations, and flip-and-nest stowing capabilities, Optima is a solid solution for flexible, multi-use areas. The strong construction and design of the product has been nearly the same since launching in 2013, only seeing slight modifications like power options, cable management, and new finishes.

40+ Years Creating Dynamic Workspaces

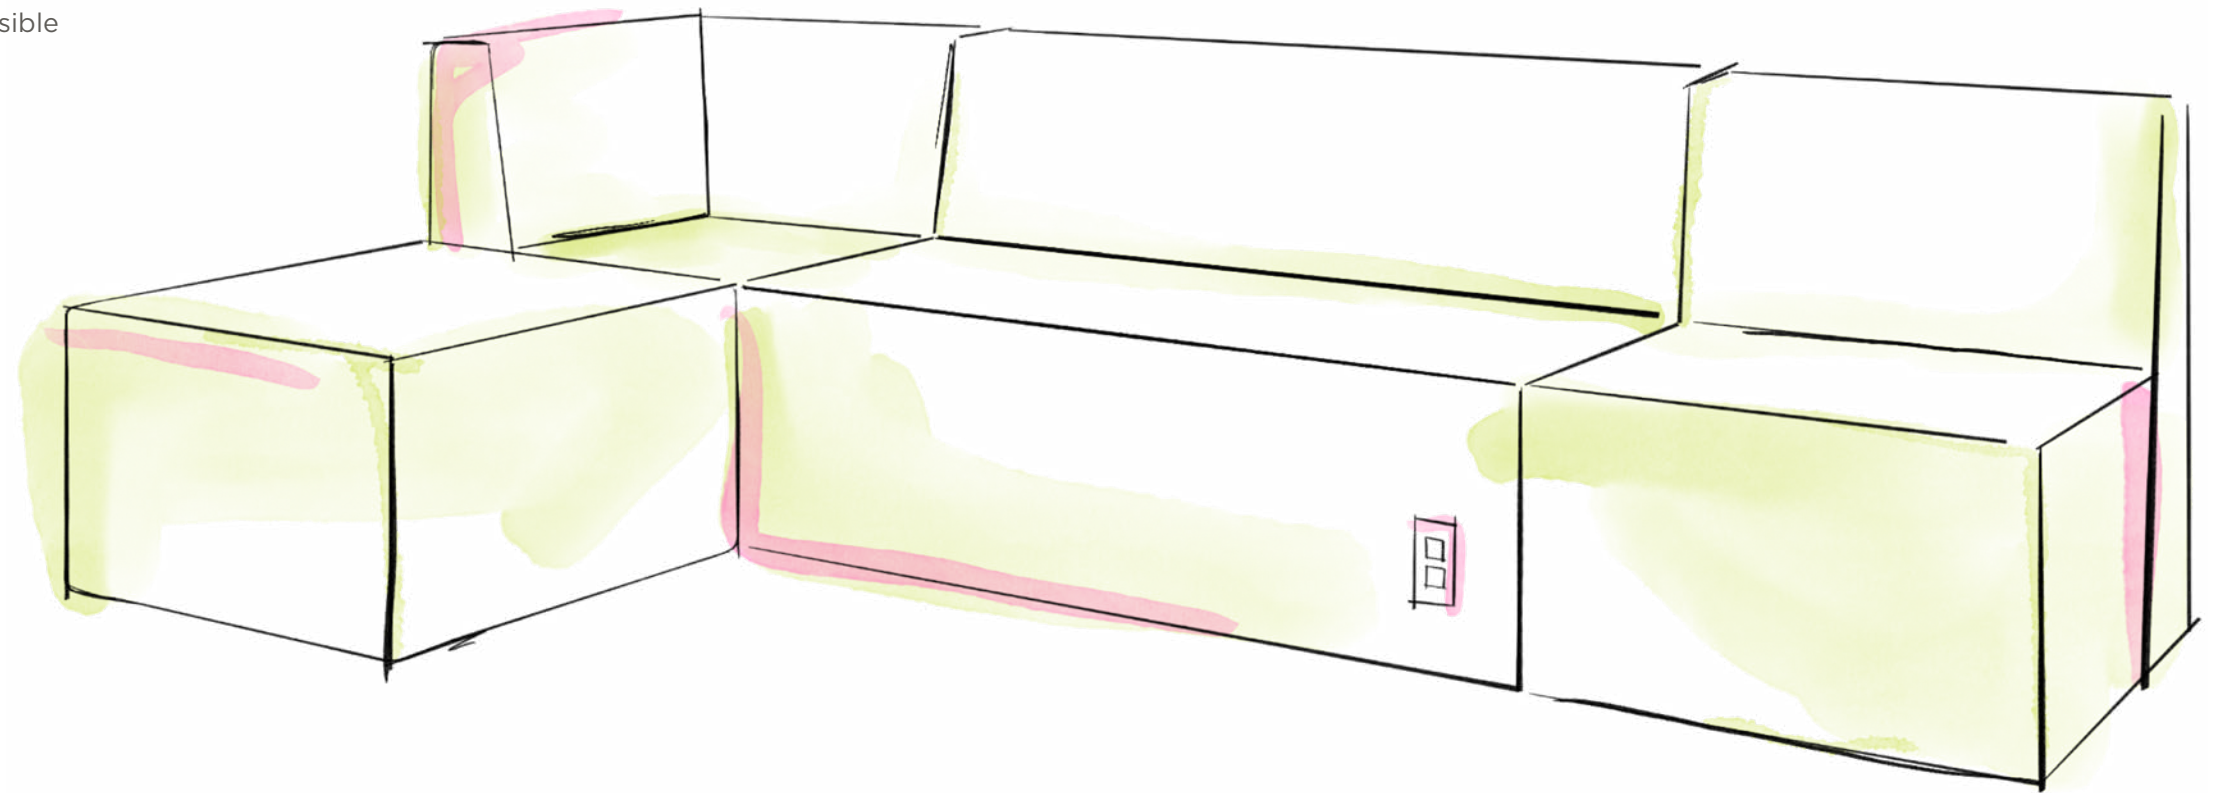

Drawing on our years of expertise, we manufacture furniture designed to enhance productivity, promote momentum, and support the many different ways people work.

Kolab

Modular Lounge Seating

Kolab is another great example of developing a solution to accommodate the growing need for collaborative workspaces. The primary issue in the industry with many third-space solutions, such as lounge seating, are the lead times. We developed Kolab with this in mind focusing heavily on high-quality materials, reliable construction, and flexibility. The modular design makes for easy mass production to provide a product like this in our FAST Program and provides dealers, designers, and end users with many possible reconfigurations in their spaces.

Cove

Office Pods

Cove adds flexible spaces to offices without the need for building permits, architects, or construction costs. These phone booths and meeting pods can be placed just about anywhere in the office to provide teams with a quiet place for phone calls, one-on-one meetings, or even team brainstorm sessions. The fact that they can be moved as you grow makes Cove a cost-efficient solution for adding usable work areas to the office and a great long-term investment for growing businesses.

Multipurpose

Tables

Clear Design has always worked to be as efficient as possible while staying true to our core values and commitment to sustainability. Through mass producing solutions for the entire workplace, we are able to reduce waste by re-purposing high-quality materials. This is ultimately how the multipurpose tables came to be and provides our dealer partners with versatile solutions for furnishing break rooms, conference rooms, private offices, and really anywhere else in the office.
