Clear Design Adds Several New Products to Its Robust Fast Program

Clear Design recently announced the addition of several new products to the office furnishings offered in its signature Fast Program. The Texas-based company known for its speed, reliability, and innovative furniture solutions for the modern workplace has added Slim Storage Pedestals, Personal Storage Drawers, High/Low Divider Brackets, and Personal Storage Hooks to its Fast Program lineup that offers an industry-leading, three-day lead time.

“We’re developing products and solutions to allow companies to create comfortable and efficient workplaces that meet the needs of today’s diverse workstyles,” said Clear Design Director Luke Warrilow. “Our Fast Program greatly impacts the speed in which our customers can have their workspace set up. We are very strategic with our product design, manufacturing, and packaging to ensure we can quickly ship orders of any size. We are excited to add products to our Fast Program to provide our customers with an ever-growing range of fast-ship options.”

PRODUCTS

The High/Low Divider Bracket allows users to quickly adjust their individual dividers for the perfect amount of privacy above and below the surface. With a quick turn of the knobs, a Tackable Fabric Divider can easily slide higher or lower to accommodate the task at hand. Need to collaborate with your peers? Slide it all the way down to open up your workstations. Need to focus? Slide it up to reduce distractions and minimize noise.

The Slim Pedestal provides ample storage while allowing for more legroom. This slim storage unit can be used in a number of ways – mount it to the underside of a workstation surface, a very convenient solution for height-adjustable desks, or add casters and a cushion topper to make it mobile. Built with reinforced steel, the Slim Pedestal is small but mighty.

The lockable Personal Storage Drawer mounts underneath the workstation surface

and is perfect for stowing personal items. The drawer has a small area above it to keep notebooks, papers, and other low-profile items within reach.

Finally, the swiveling Personal Storage Hook also mounts underneath the surface to provide an area for hanging items like purses, bags, lunch packs, and other items users would like to keep off the floor.

“As we design new products, we test with a variety of environments, applications,

and use cases to gain valuable insights and ensure we put forward the best solutions,” continued Warrilow. “For instance, special care went into the final design of the storage hook to ensure handbag or computer bag straps don’t bend or develop odd peaks and creases.”

The new items are each available in Black, White, or Silver and ship in just three business days. 📦
